

Software engineer on Product

Software engineering skills we look for:

1. Velocity of fixing a bug
2. Correctness of a code
3. Building tools to automate 1 & 2

Ideal candidate:

- * Someone who wants to launch their startup in a few years from now
- * Enjoys brainstorming, quick prototyping and eventually taking it to production
- * Interest in natural language processing (NLP) and machine learning
- * Understanding of backend architectures and service deployment

Assignment:

- * Identify romantic dialogues in Game of Thrones script
(<https://www.kaggle.com/albenft/game-of-thrones-script-all-seasons/data#>)
- * Bonus points if you can also assign a score and sort them by the likelihood of a couple saying them to each other
